THE JAPAN BUSINESS ASSOCIATION IN VIETNAM

No.: DN28/2016HHDNNB

Re: Concern about Euro4 emission implementation

THE SOCIALIST REPUBLIC OF VIETNAM

Independence – Freedom – Happiness

Hanoi, October 24th 2016

To: **H.E. Prime Minister Nguyen Xuan Phuc**
C/c: Government Office
Ministry of Industry and Trade (MOIT)
Ministry of Transportation (MOT)
Ministry of Science and Technology (MOST)
Ministry of Finance (MOF)

On behalf of Japan Business Association in Vietnam (JBAV), I would like to express a greeting and sincere thanks to MOIT for your valuable support to JBAV operation in general and our membership company in particular.

By this letter, JBAV would like to report to H.E. Prime Minister regarding a serious concern about Euro4 emission implementation which was scheduled to start from January 1st, 2017 according to Prime Minister's decision No. 49/2011/QD-TTg (Decision 49). It is totally unclear for Japanese automakers because Euro 4 fuel introduction has not confirmed yet, while only more than 02 months remains.

In line with Government direction of environment protection and perusal to the decision 49, Japanese automakers have seriously prepared during the last 06 years and now they are ready to upgrade from Euro 2 engines to Euro 4 engines before 1st January 2017. However, until now Euro 4 fuel has not yet supplied to the market. JBAV is very much concerned about using Euro 4 engines with Euro 2 fuel will cause serious impacts on performance and durability of the engine, as well as on emission of the vehicle; impacting to environment protection and benefit of vehicle consumers.

The impact is even more serious for diesel engines, especially big diesel engines using for buses and trucks. They are very much concerned about this issue

because until now there is no detail information of Euro 4 fuel introduction roadmap: by when, which province, how many fuel stations?

Due to this concern and a long awaiting for Euro 4 fuel introduction, some makers have to delay their preparation for Euro 4 diesel vehicle introduction. And it would take them around 1 year for restart the preparation for Euro 4 diesel vehicle introduction from planning, ordering to homologation and production.

In order to implement Decision 49, contribute to environment protection and for consumer benefits, JBAV would like to send our proposal to H.E. Prime Minister regarding Euro 4 emission roadmap as follow:

-To prevent miss-fuelling to vehicles as well as possible fraudulence in fuel supply, it's necessary to fully replace Euro 2 fuel with Euro 4 fuel.

- Under above condition, it is better to implement at the soonest.

- However, for diesel vehicle is to delay at least 1year for restart the reparation of EURO4 diesel vehicle introduction.

Above is JBAV proposal to H.E. Prime Minister for your considerable support in the due course.

Yours sincerely,

The Japan Business Association in Vietnam

Chairman, Yanai Taiji
