Re.: JBAV proposal for Euro4 emission implementation

To: Yours Excellency Nguyen Xuan Phuc, Prime Minister

C/C: Government Office

Ministry of Industry and Trade

Ministry of Transportation

Ministry of Science and Technology

Ministry of Finance

Subject: JBAV proposal for Euro4 emission implementation

First of all, The Japan Business Association in Vietnam (JBAV) would like to express a greeting and sincere thanks to Yours Excellency Prime Minister for your valuable support to JBAV operation in particular and Vietnam automobile industry in general.

By this letter, JBAV would like to express our deep concern on implementation of Euro4 emission following Prime Minister's decision No. 49/2011/QD-TT dated September 1st, 2011 ("Decision 49").

JBAV would like to thank for official letter of Government Office No. 126/TB-VPCP dated March 10th 2017 that Prime Minister agreed for our automobile members to continue production and importation of Euro2 diesel vehicles until December 31st 2017. However, up to now many our members have to stop their production, importation and sales of Euro2 diesel vehicles already due to a long waiting for an official decision from Prime Minister.

Therefore, JBAV would like to propose Yours Prime Minister to take following actions urgently in order to support our automobile members to continue normal operation as soon as possible:

Prime Minister to approve urgently an official decision to allow JBAV automobile members to continue production, importation and sales of Euro 2 diesel vehicles/CKD kits.

For your consideration, JBAV would like to report to you a history of our automobile member proposal to Government on this Euro4 implementation since May 2016.
In line with Government direction of environment protection and perusal to the Decision 49, our automobile members have seriously prepared during the last 06 years for upgrading from Euro 2 engines to Euro 4 engines. However, until now Euro 4 fuel has not yet supplied to the market nation-wide. We are very much concerned about using Euro 4 engines with Euro 2 fuel will cause serious impacts on performance and durability of the engine, as well as on emission of the vehicle; impacting to environment protection and benefit of consumers. The impact is even more serious for diesel engines, especially big diesel engines using for buses and trucks.
Up to now Euro4 gasoline fuel is available in some Petrolimex fuel stations only, Euro4 diesel is not yet available.
Therefore, many JBAV members have to delay their preparation of Euro 4 diesel vehicles. Normally, it would take 1 year for restarting the preparation.

We would like to thank you very much for your considerable support in the due course.

We are looking forward to hearing from you soon.

Yours sincerely,

THE JAPAN BUSINESS ASSOCIATION IN VIETNAM
Chairman

Taiji Yanai
